

Other Considerations: Endovascular Intervention

- Intracerebral aneurysms with or without subarachnoid hemorrhage
- Arteriovenous malformations with or without hemorrhage

Adjunctive and curative embolization
Peripheral and intracranial

- Carotid or Vertebral Artery Dissection
- Symptomatic Subclavian stenosis
- Complex endovascular reconstruction of inoperable aneurysms
- Open craniotomy and bypass procedures
- Extra and intracranial stent procedures
- Extra and intracranial angioplasty
- Peripheral and intracranial
- Pediatric and Adult
